Relative humidity should be no more than 65%. Carpet must "breathe" prior to installation. Carpet and other items to be installed shall condition in the space to be carpeted for a minimum of 24 hours prior to installation. Contractor shall cease work and notify the government immediately if any deficiency is found.

2) Floor Condition & Inspection: Contractor shall inspect the floor to identify deficiencies including cracks or hollow spaces/cavities in the existing finish floor or sub-floor. Contractor shall cease work and notify the government immediately if any deficiency is found. The sub-floor must be structurally sound and dry prior to installation. The temperature of the interior environment, including the sub floor should be no lower than 65°F and no higher than 90°F at least 72 hours prior to, during and after the tile installation.

B. Clean and Prime Floor

1) Floor Cleaning: Contractor shall sweep and vacuum the floor and maintain a clean floor throughout the installation process. Completely remove all wax, dirt, grease, paints or old adhesives (especially cutback or emulsion). DO NOT use solvents or any other chemical adhesive removers to clean the sub-floor. DO NOT use oil-based or silicone based sweeping compound. Clean the sub-floor of all excess concrete spots, solid debris or paint spots using suitable scraping methods. Floors should be damp mopped and allowed to fully dry prior to product installation.

2) Prime Floor: Apply Tandus Centiva C-36E floor primer to all floors where carpet will be installed. Primer is to spread at a rate of 130 square yards per 4 US gallon bucket. Primer can be applied using a paint roller. Allow the primer to dry completely. Primer turns light blue and will not transfer to the touch when dry. Contractor shall follow manufacturer’s application instructions.

C. Carpet Tile Installation

1) Carpet tile is a “peel and stick” product with a self-adhesive backing. No additional adhesive is required or shall be utilized. Full tiles and cut tile shall be dry fit prior to installation. Carpet tiles are installed by removing the protective plastic membrane from the back of the tile, positioning the tile on the floor as needed and pressing the tile firmly onto the floor. Carpet shall be tightly fit to form seams without gaps or entrapped pile yarns and aligned with adjoining tiles.
When the tiles are properly positioned roll with a 75 to 100 lb roller to assure a positive contact between the tile backing and the sub-floor. Tiles can be removed from the sub-floor at any time for realignment.

2) Doorframe & Doorways: Carpet must be fit snug around door frames. Carpet tile shall be notched to ensure carpet butts to doorframes. Carpet tile shall follow the line of the wall across doorway.

3) As the carpeting is installed, remove and dispose of all trimmings, excess pieces of carpeting and laying materials from each area as it is completed. Vacuum carpeting and remove adhesives, stains and soil spots in accordance with the carpet manufacturer's recommendations.

4) Corridor Carpet Tile Pattern: Carpet Tile shall be placed in a brick pattern. Each row shall be staggered by one-half the width of the carpet tile. Carpet tile shall be installed by placing centerline along the entire corridor equidistant from the wall and then following a “3-4-5 triangle” method to ensure the carpet is placed in a perpendicular and horizontal arrangement. Directional arrows are printed on the back of all tiles. Determine the “arrow direction” for the installation and make sure all tiles are installed in the same direction. Carpet tile must be cut/trim where the carpet tile meets the wall. Dry fit all tiles in sections prior to removal of adhesive backing. All floor lines and marking shall be from white (not blue or red) chalk.

5) VIP Bedroom Living Room Carpet Tile Pattern: Carpet Tile shall be placed in a monolithic pattern. Carpet tile shall be installed by marking the center point of opposing, parallel walls and then following a “3-4-5 triangle” method to ensure the carpet is placed in a perpendicular and horizontal arrangement. Directional arrows are printed on the back of all tiles. Determine the “arrow direction” for the
installation and make sure all tiles are installed in the same direction. Carpet tile must be cut/trim where the carpet tile meets the wall. Dry fit all tiles in room prior to removal of adhesive backing. All floor lines and marking shall be from white (not blue or red) chalk.
